STREAMLIGHT LIGHTING THE WAY FOR 50 YEARS

1973

1973 Streamlight founded by engineers who created solar simulators for NASA.

1980 LiteBox® lantern invented by Streamlight.

1989 Streamlight introduces the Survivor® line. Still the world's #1 right-angle rechargeable flashlight.

1998
1999 Vulcan®, Stylus® and Propolymer® series debut.

2001 Streamlight leads the market with innovative LED lighting products.

2003 Streamlight combines LED and Xenon lights in patented Twin-Task® series. New Tactical line premieres featuring Super High Flux LEDs. Fire Vulcan aids firefighter safety as the first lantern with LED tail lights.

1975 Rechargeable halogen lamp flashlight introduced by Streamlight.

MID 1980's Variety of miniature flashlights introduced.

1994 Stinger® series introduced – becomes the standard duty light for law enforcement. Streamlight creates the Scorpion®, lithium-powered, lightweight flashlight with rubber grip.

2000 Streamlight builds state-of-the-art manufacturing facility/corporate headquarters in Eagleville, PA.

2004 Streamlight introduces Strion®, the world's first ultra-compact rechargeable. At just 4.6 oz., it shines as bright as lights 5 times its size.

2005 FireBox[®] is introduced with bright blue LED tail lights that help firefighters be seen in heavy smoke.

2007

Dual-switch Stinger DS[®] debuts. Streamlight creates a million candela (Peak Beam Intensity) lantern – the HID LiteBox[®], with a beam that reaches 1.5 miles. The Sidewinder[®] debuts as the most versatile military light, with multiple LEDs and varying brightness levels for each.

2009

Streamlight introduces the Strion[®] LED, creating the first lithium ion rechargeable gun-mounted and hand-held tactical light. The new PolyStinger[®] LED becomes our first rechargeable polymer body LED flashlight.

2017

The Vulcan[®] 180 is launched. Designed to burn brighter and run longer, it is an essential firefighting and utility tool. This rechargeable, waterproof lantern/scene light has a 180° tilting head to direct the light where needed.

2006

Streamlight introduces our first aluminum gun-mounted lights, TLR-1[®] & TLR-2[®]. LED versions of the Stinger[®] and Survivor[®] are created.

2008

C4[®] LED technology introduced to multiply the brightness of LEDs up to three times. Streamlight expands headquarters and manufacturing facilities with 75,000-ft. addition.

2014

Streamlight introduces the Portable Scene Light with a 72" extension pole designed to rapidly deploy and easily stow.

2016

Streamlight launches MULTI-FUEL technology that allows the user to swap standard lithium batteries with our SL-B26 USB rechargeable battery pack to turn their ProTac[®] 2L-X and ProTac[®] HL-X into rechargeable lighting systems.

2020

The Stinger[®] 2020 is the next evolution in high-performance flashlights – produce 2,000 lumens. Its anti-roll design is ergonomically shaped for a sure grip. It features dual power switches and an intuitive mode selector switch for ease of use.

THE NEXT EVOLUTION IN HIGH-PERFORMANCE FLASHLIGHTS

STINGER® 2020

The next evolution in high-performance, work-ready flashlights produces 2,000 lumens. Its aluminum alloy body with textured side panels and anti-roll design is ergonomically shaped for a sure grip. It features dual power switches and an intuitive mode selector switch for ease of use. Select high for brightest light or low for extended run time. Long-lasting SL-B26® USB rechargeable battery packs offer multiple charging options using existing Stinger smart chargers and bank chargers to charge inside the light; use a dual USB cord to charge the battery pack outside the light or a Li-ion battery bank charger to charge multiple batteries at once. IPX7 waterproof to 1m submersion, corrosion-resistant sealed glass lens.

// COLOR-RITE TECHNOLOGY®

// WHAT IS COLOR-RITE TECHNOLOGY?

Color-Rite Technology is based on the Color Rendering Index (CRI) -- a scale from 0-100 that indicates how a light source reflects color variations as they appear to the human eye. The higher the CRI, the more vibrant the colors appear. On the scale, lights that measure 90+ are considered "high" CRI lights and are critical for tasks requiring the most accurate color discrimination. A perfect 100 would enable us to see colors as they appear in natural sunlight.

// WHY STREAMLIGHT COLOR-RITE TECHNOLOGY?

Flashlights equipped with Streamlight's proprietary Color-Rite Technology allow users to see the color spectrum as they would in natural light. While a standard high-lumen LED light produces an ultra-bright white beam that is needed in many applications, it prevents seeing subtle color differences in, for example, auto body paint colors or electrical wiring. In contrast, a high CRI light provides a softer, warmer beam to prevent color "washout," allowing the user to see specific colors or imperfections and subtle details, regardless of the task.

// COLOR-RITE® APPLICATIONS FOR EVERY SITUATION

Streamlight offers a family of Color-Rite® lights for situations that require detailed inspections or color differentiation. For markets as diverse as automotive, industrial, law enforcement, military and even outdoor recreation, we have developed high CRI lights with Color-Rite Technology® for a wide variety of tasks that require exacting attention to detail. From repairing electrical wires to inspecting paint finishes or examining forensic evidence, count on Streamlight's Color-Rite® products help get the job done efficiently and safely. Our family of Color-Rite® products include the following:

STINGER® COLOR-RITE®

Rechargeable, warm white (3,000K) 90 CRI LED with Streamlight's Color-Rite Technology®

// A LIGHT FOR EVERY SITUATION

// COLOR-RITE® APPLICATIONS BY MARKET

LAW ENFORCEMENT/MILITARY

- **Improve tracking in low-light conditions.** High CRI lights like the Stinger® Color-Rite® help border patrol and other law enforcement agencies reveal subtle details of tracks and other markings that white LEDs with their bright “hot spots” can miss.
- **Detect trace evidence.** Forensic teams can more clearly spot fingerprints, fibers and other trace evidence on glass and other slick surfaces with high CRI lights such as the Stinger® Color-Rite®.
- **Enhance visualization.** High CRI lights can help cut through murky lake or ocean water, thick smoke or fog, and even heavy dust when pursuing vehicles in rough terrain.

AUTOMOTIVE

- **Match and identify colors.** The Dualie® 3AA Color-Rite®, FlipMate®, Stinger Switchblade®, Syclone® and Strion Switchblade® are ideal for color matching and identifying body imperfections before and after paint repairs.
- **Identify defects.** Paint defects such as swirl marks and color sanding scratches are easily identifiable with high CRI LEDs.
- **Distinguish colors.** When troubleshooting electrical short circuits or other motor vehicle repairs, high CRI lights assist in differentiating colored wires in hard-to-see areas under a hood or carriage.
- **Reduce glare when working in tight spaces.** Because high CRI LEDs reflect back less light than bright white LEDs, mechanics can see greater detail when working in dark, hard-to-reach places underneath a car or under the hood.

INDUSTRIAL

- **Differentiate wire colors in electrical panels.** In plants and other facilities, high CRI lights like the Dualie® 3AA Color-Rite®, FlipMate® and Syclone® provide better color contrast of intricate wires in electrical cabinets, helping technicians to work more efficiently.
- **Spot imperfections.** High CRI lights allow for contrast of color to identify imperfections in finish inspections of products, including parts.
- **Reduce eye fatigue.** The soft lighting of high CRI LEDs reduces eye strain and fatigue for many users.

FIRE/RESCUE/EMS

- When responding to fires, accidents or other events under low light conditions, high CRI area lights such as the Dualie® 3AA Color-Rite®, Stinger Switchblade®, and Stinger® Color-Rite® can be essential tools, permitting first responders to **see the color spectrum as they would in natural daylight**.
- High CRI lights also allow investigators to **see specific colors, imperfections and subtle details** when examining fire or accident scenes and gathering evidence.

OUTDOOR RECREATION

- **Identify blood trails.** State-of-the-art blood trailing technology in high CRI lights, such as the Stinger® Color-Rite®, reduces certain colors in the spectrum to better amplify blood trails.
- **Visualize in low-light conditions.** Hikers and other outdoor enthusiasts use high CRI lights like the Dualie® 3AA Color-Rite® to better see obstacles when navigating trails at night and under other low-light conditions.

SUPER SIEGE®

The Super Siege rechargeable scene light/work lantern provides 360° of bright light that illuminates an entire scene. A rechargeable lithium ion battery supplies the power to charge your Streamlight flashlights, smartphones and tablets. Remove the globe cover and hang the Super Siege upside down by its D-ring for large area lighting needs. Use the Glare Guard™ to shield light from 1/2 the globe for up-close task lighting. Set it to SOS mode for emergency situations. Working in a grueling environment? No problem! Its rubber base keeps it stable on slippery or uneven surfaces, and a watertight storage compartment keeps small items dry. IPX7 waterproof to 1m. It floats.
