STREAMLIGHT LIGHTING THE WAY FOR 50 YEARS

1973

1973 Streamlight founded by engineers who created solar simulators for NASA.

1980 LiteBox® lantern invented by Streamlight.

1989 Streamlight introduces the Survivor® line. Still the world's #1 right-angle rechargeable flashlight.

**1998
1999** Vulcan®, Stylus® and Propolymer® series debut.

2001 Streamlight leads the market with innovative LED lighting products.

2003 Streamlight combines LED and Xenon lights in patented Twin-Task® series. New Tactical line premieres featuring Super High Flux LEDs. Fire Vulcan aids firefighter safety as the first lantern with LED tail lights.

1975 Rechargeable halogen lamp flashlight introduced by Streamlight.

MID 1980's Variety of miniature flashlights introduced.

1994 Stinger® series introduced – becomes the standard duty light for law enforcement. Streamlight creates the Scorpion®, lithium-powered, lightweight flashlight with rubber grip.

2000 Streamlight builds state-of-the-art manufacturing facility/corporate headquarters in Eagleville, PA.

2004 Streamlight introduces Strion®, the world's first ultra-compact rechargeable. At just 4.6 oz., it shines as bright as lights 5 times its size.

2005 FireBox® is introduced with bright blue LED tail lights that help firefighters be seen in heavy smoke.

2007

Dual-switch Stinger DS® debuts. Streamlight creates a million candela (Peak Beam Intensity) lantern – the HID LiteBox®, with a beam that reaches 1.5 miles. The Sidewinder® debuts as the most versatile military light, with multiple LEDs and varying brightness levels for each.

2009 Streamlight introduces the Strion® LED, creating the first lithium ion rechargeable gun-mounted and hand-held tactical light. The new PolyStinger® LED becomes our first rechargeable polymer body LED flashlight.

2017

The Vulcan® 180 is launched. Designed to burn brighter and run longer, it is an essential firefighting and utility tool. This rechargeable, waterproof lantern/scene light has a 180° tilting head to direct the light where needed.

2006

Streamlight introduces our first aluminum gun-mounted lights, TLR-1® & TLR-2®. LED versions of the Stinger® and Survivor® are created.

2008

C4® LED technology introduced to multiply the brightness of LEDs up to three times. Streamlight expands headquarters and manufacturing facilities with 75,000-ft. addition.

2014

Streamlight introduces the Portable Scene Light with a 72" extension pole designed to rapidly deploy and easily stow.

2016

Streamlight launches MULTI-FUEL technology that allows the user to swap standard lithium batteries with our SL-B26 USB rechargeable battery pack to turn their ProTac® 2L-X and ProTac® HL-X into rechargeable lighting systems.

2020

The Stinger® 2020 is the next evolution in high-performance flashlights - produce 2,000 lumens. Its anti-roll design is ergonomically shaped for a sure grip. It features dual power switches and an intuitive mode selector switch for ease of use.

WANT TO SEE THESE BEAMS IN ACTION?

Visit Streamlight's beamdemo.com and see the differences for yourself.

DIFFERENT KINDS OF BEAMS FOR DIFFERENT KINDS OF TASKS.

TRADITION SERIES

This family of flashlights delivers the optimal balance of bright, far-reaching beam, ample peripheral light, and long run times. When you're out in the field or on any job that requires light for long periods, these are the flashlights you want by your side. Their brightness, power, performance, cost, and extended run times make them perfect for a variety of tasks.

HPL SERIES

These High Performance, High Lumen flashlights throw bright light a long distance. They have a bigger hot spot that casts more light on the target with more peripheral light. They're great for illuminating the entire length of a dark alley, for any task that requires a far-reaching beam.

HL SERIES

These High Lumen flashlights have a wide, side-to-side beam. They illuminate an entire area, including what may be hiding in corners. They perform like floodlights, illuminating a whole room, vehicle, or any area with bright, revealing light.

Multi-battery versatility means the user can always use primary disposable batteries to power the light if the rechargeable battery is out of power and a charging source is not available. The PolyTac X is a bright and compact personal polymer light. Superior grip texture for a comfortable/slip-resistant feel. TEN-TAP® Programming lets you choose the order of operating modes. IPX7-rated waterproof to 1 meter for 60 minutes. Maximum light output throughout battery life.

STINGER® 2020 — SEARCH, DETECT, DEFEND

STINGER® 2020

The next evolution in high-performance flashlights produces 2,000 lumens. Its aluminum alloy body with textured side panels and an anti-roll design is ergonomically shaped for a sure grip. It features dual power switches and an intuitive mode selector switch for ease of use. Select high for brightest light or low for extended run time. A long-lasting SL-B26® USB rechargeable battery pack offers multiple charging options using existing Stinger smart chargers and bank chargers to charge inside the light; use a dual USB cord to charge the battery pack outside the light or a Li-ion battery bank charger to charge multiple batteries at once. IPX7 waterproof to 1m submersion, corrosion-resistant sealed glass lens.

// COLOR-RITE TECHNOLOGY®

// WHAT IS COLOR-RITE TECHNOLOGY?

Color-Rite Technology is based on the Color Rendering Index (CRI) -- a scale from 0-100 that indicates how a light source reflects color variations as they appear to the human eye. The higher the CRI, the more vibrant the colors appear. On the scale, lights that measure 90+ are considered "high" CRI lights and are critical for tasks requiring the most accurate color discrimination. A perfect 100 would enable us to see colors as they appear in natural sunlight.

// WHY STREAMLIGHT COLOR-RITE TECHNOLOGY?

Flashlights equipped with Streamlight's proprietary Color-Rite Technology allow users to see the color spectrum as they would in natural light. While a standard high-lumen LED light produces an ultra-bright white beam that is needed in many applications, it prevents seeing subtle color differences in, for example, auto body paint colors or electrical wiring. In contrast, a high CRI light provides a softer, warmer beam to prevent color "washout," allowing the user to see specific colors or imperfections and subtle details, regardless of the task.

// COLOR-RITE® APPLICATIONS FOR EVERY SITUATION

Streamlight offers a family of Color-Rite® lights for situations that require detailed inspections or color differentiation. For markets as diverse as automotive, industrial, law enforcement, military and even outdoor recreation, we have developed high CRI lights with Color-Rite Technology® for a wide variety of tasks that require exacting attention to detail. From repairing electrical wires to inspecting paint finishes or examining forensic evidence, count on Streamlight's Color-Rite® products help get the job done efficiently and safely.

Our family of Color-Rite® products include the following:

STINGER® COLOR-RITE®

Rechargeable, warm white (3,000K)
90 CRI LED with Streamlight's
Color-Rite Technology®

FLIPMATE®

Compact work light with cool white LEDs
and warm white (4,000K) 90 CRI LEDs with
Streamlight's Color-Rite Technology® - each
with high and low modes

STINGER SWITCHBLADE®

Five lights in one:
Drop Light | Hands-Free | White Light | Color-
Rite® Light (4,000K) | UV Light

STRION SWITCHBLADE®

Five lights in one:
Drop Light | Hands-Free | White Light |
Color-Rite® Light (4,000K) | UV Light

SYCLONE®

Ultra-compact work light with a cool
white LED and a warm white (4,000K) 90
CRI LED with Streamlight's
Color-Rite Technology®

LAW ENFORCEMENT/MILITARY APPLICATION:

- Improve tracking in low-light conditions. High CRI lights like the Stinger® Color-Rite® help border patrol and other law enforcement agencies reveal subtle details of tracks and other markings that white LEDs with their bright "hot spots" can miss.
- Detect trace evidence. Forensic teams can more clearly spot fingerprints, fibers and other trace evidence on glass and other slick surfaces with high CRI lights such as the Stinger® Color-Rite®.
- Enhance visualization. High CRI lights can help cut through murky lake or ocean water, thick smoke or fog, and even heavy dust when pursuing vehicles in rough terrain.

STINGER® COLOR-RITE®

NEW

The Stinger Color-Rite features a warm white 90 CRI LED (3,000K) with Color-Rite Technology® that produces a more natural light so you can differentiate between paint or wire colors. Reduced glare prevents eye fatigue and helps cut through murky atmospheres. Ideal for low-light tracking and detecting trace evidence. IPX4; water-resistant.

THE SIEGE SERIES THEY'VE GOT SURVIVAL INSTINCTS

SIEGE® AA

The Siege® AA lantern features one white LED, and two red LEDs. There are five output modes and a battery level indicator built into the on/off button. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D ring for large area lighting needs. Battery replacement is a breeze with the center post orienting the battery cover correctly every time. IPX7 waterproof to 1m submersion; 2m impact resistance tested.

The yellow Seige AA has three strong magnets in the base. It's now a versatile, hands-free work light that can be attached to steel surfaces like engines, machines, or other equipment.

SUPER SIEGE®

The Super Siege® lantern features five white LEDs, one white and four red LEDs with six output modes and a battery level indicator built into the on/off button. A 10,400 mAh rechargeable lithium ion battery supplies the power for the lantern as well as enabling you to recharge all your electronic devices from the handy USB port. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D ring for large area lighting needs. Utilize the included Glare Guard™ to shield light from 1/2 the globe, allowing you to direct light on your work zone. A small storage area is provided in the base of the light for all your “keep dry” needs. Simply rotate the bottom cover counter clockwise to remove and access the storage compartment.

THE SIEGE®

The Siege is brighter, more durable, and much more versatile than other emergency/camping lanterns. It's bright enough to light up a whole campsite. It runs for over 30 hours on high, and over 12 days on low! Its handle and D-rings allow you to hang it or clip it almost anywhere, upright or inverted. It has 3 white light settings, a red light for softer, less intense light, and an SOS mode. Remove the top for brighter light. Battery indicator flashes to alert you to low battery.
